Title of Thesis: The Method of the Holy Quran in the Treatment of Intransigence and Urgent Torture.
From the beginning of the creation and the beginning of the Apostles' sending peace be upon them, people began to divine vocations: there are those who believe in them, are sure of monotheism. Another group, on the contrary, disbelieved in the apostles and messages, and a group that chose the aberration and adulation, showing faith and defending disbelief. And the path of guidance in the way of the abolition and corruption, I installed the passions, and plunged

the mind from its high tower to the soles of the feet of the ignorance and disbelief on their false tips. So what is intransigence? What is the view of Islam to him? What are the areas where the people of this category intransigence? What prompted these groups to harden and demand the torment they were promised? What kinds of torment that came down to them? What are the implications of intransigence on the individual and society? What is the Koranic approach in the treatment of this category? The message came to answer these questions, the study of the great Qur'an and follow the verses mentioned in which the mention of intransigence and his people, and their motives behind their intransigence and their request for torment, and the statement of the method of the Koran in their dialogue and argument and call them to the realization of reason to reach the truth and righteousness.
